~~Mental Philosophy~~ first - then ~~Moral~~
~~Mathematics~~ - then Latin - then Greek - then
~~Physical Science~~ - then German - then
~~French & Early Civil Engineering~~

THERE are frequent written translations of Latin and Greek into English, as well as the Exercises of translating English into Latin and Greek by the members of each class; (and the members of the Senior Class are required frequently to present written analyses of the authors and subjects belonging to this part of the course of studies.) Each student is required to present a composition once a month to one of the Professors to whom he recites, and there are declamations in the chapel weekly on Friday evening, by the classes in divisions. A Bible recitation is attended by all the students on Sabbath evenings.

The Freshman and Sophomore Classes recite five times a week on Mathematics, Latin and Greek. The Junior Class recite five times a week on Mathematics, and three times a week on ~~Latin~~ ^{and Latin or French} Greek, Mental Philosophy and Chemistry. The Senior Class recite five times a week on Moral Philosophy, Logic, Political Economy, Evidences of Christianity, &c.; and three times on Physical Science, ^{and} Latin ~~and~~ Greek. The classes in German and French recite, each, three times a week.

Hampden Sidney professes to be a College merely, and not a University. She retains a curriculum of study, which long time and varied experience have proven to be best adapted to effect a *liberal* education, as distinguished from education of a purely business, or professional character. Students are prepared for the professional schools, whether secular or religious, of the very highest grade, or fitted for the proper discharge of the duties of an enlightened citizen. Believing that the culture of all the mental faculties, designed to be here accomplished, is best effected by the complete and thorough mastery of what is taught, the catalogue of text-books is not so extended as to necessitate the hasty, superficial and imperfect study and acquisition of the contents of books written on a vast number of subjects—however valuable and important in themselves.

As every thing cannot be taught, within four years, to youth of ordinary abilities, the attempt to do so is not made; but rather to do well, and thoroughly, what is professed to be done.

Admission.

CANDIDATES for admission into the College, are examined by the Faculty, and placed in the class which they are prepared to enter. Candidates for admission into any particular class must stand an examination on *all* the course previously pursued by the class. In *all* cases the candidate is required to present satisfactory testimonials as to his moral character and standing in the institution which he *last attended*. Examinations for admission, commence on Tuesday before the session opens.

Students desiring to pursue a particular branch of study, are permitted to enter any class in College for which they are found prepared, subject, however, to the direction of the Faculty in the amount of study required, which shall in all cases be equal to that of regular students.

Religious Exercises.

STUDENTS are required to attend prayers in the chapel, Bible-class on the Sabbath, and church in such places as their parents or guardians shall request; or without such request, in the place appointed by the Faculty.

Monthly Circulars.

EACH Professor keeps a daily record of the attendance and recitations of the members of his classes, and at the end of every month the average standing in scholarship, the number of absences from recitations, chapel and church, together with any improper deportment requiring particular notice, is transmitted to the parent or guardian of each student in the institution.

The cost of board may be reduced to \$6 or \$10 per month by joining private messes in College.

Members of the Junior Class in Chemistry pay a fee of \$7.00.

Students who enter on the scholarships pay no tuition fees, but are liable for all the other charges, *which must be paid in advance.* The incidental expenses will depend upon the habits of the student and the allowance from home. There is no more fruitful sources of injury to the student than too large a supply of pocket-money.

By an act of the Board of Trustees, wounded soldiers of the late Confederate armies, and sons of those killed in battle, are admitted free of tuition.

Candidates for the Gospel Ministry pay tuition fees, or not, as they prefer.

Halls and Libraries.

THE halls of the Literary Societies are fitted up with great taste and neatness, and the libraries containing about 3,500 volumes each, have been selected with care, and are constantly increasing by additions from the choicest productions of the modern press.

Location, Remarks, &c.

HAMPDEN SIDNEY COLLEGE is situated in Prince Edward County, Va., and is reached by daily stage from Farmville, which is on the Southside portion of Atlantic, Ohio & Mississippi Railroad. The locality is proverbially one of the most healthy in Virginia. Union Theological Seminary is in its immediate vicinity, and the students of either institution have access to the lecture rooms and libraries of the other, free of charge. The College is surrounded by a community distin-

guished for intelligence, morality and piety, in the families of which students may enjoy all the social advantages consistent with a life of study. Its quiet situation in the country, removed from the bustle of life, and from the temptations incident to town or city, associated with the above-named advantages, renders this College one of the most desirable retreats to every student who aims to secure the thorough culture of his mind and heart, and the formation of correct ideas.

Communications on business should be addressed to the President,

REV. J. M. P. ATKINSON, D. D.,
Hampden Sidney College, Va.
